

FAST FACTS

ABOUT SHEEP PRODUCTION

In 2019, there were 101,387 sheep farms and ranches in the United States¹.

Through genetics, sheep producers in the United States tend to produce a dual-purpose animal – one that is valued for both its meat and its wool. Sheep are also raised for producing milk, some of which is processed into cheese.

Following is a ranking of the **total sheep operations per state** based on 2019 data¹ (most current data):

- | | |
|------------------------------|------------------------------|
| 1. Texas14,672 | 26. Montana1,383 |
| 2. Arizona 7,509 | 27. South Dakota.....1,337 |
| 3. Ohio4,123 | 28. Kansas.....1,234 |

| 18. Oklahoma.....2,216 | 43. North Dakota.....573 |
| 19. New York.....2,113 | 44. Hawaii.....548 |
| 20. Utah.....1,898 | 45. New Hampshire502 |
| 21. Illinois.....1,870 | 46. Connecticut.....428 |
| 22. Colorado.....1,731 | 47. Nevada.....328 |
| 23. North Carolina1,679 | 48. Rhode Island108 |
| 24. Florida.....1,666 | 49. Delaware.....89 |
| 25. Idaho.....1,447 | 50. Alaska.....49 |

As of Jan. 1, 2020, there were 5.2 million head of sheep in the United States².

Sheep are produced in all 50 states. However, the highest sheep-producing states are located west of the Mississippi River, where most of the larger sheep ranches reside. The eastern part of the country supports a greater number of smaller, pasture-based operations.

Following is a state ranking of the **total number of sheep and lambs** as of Jan. 1, 2020:

- | | |
|-----------------------------|------------------------------|
| 1. Texas735,000 | 18. Michigan85,000 |
| 2. California.....570,000 | 19. Wisconsin81,000 |
